We empower public sector organizations and vendors with secure, scalable cloud solutions (AWS & GCP) leveraging GitOps, Kubernetes, and DevOps (CI/CD, DevSecOps) for automated, agile, and reliable deployments of enterprise IT applications.

Core Competencies

Services

- Cloud Computing infrastructure design
- Cost optimization with Containerization and Serverless
- Automation & Self-Service implementation

Industries Served

- Telecom
- Aviation
- DoD
- Software as a Service

Technologies Used

- AWS and GCP
- Kubernetes
- CI/CD, GitOps, AI

Differentiators

- **Open-Source Advantage:** We leverage well-trusted, secure, and industry-adopted open-source technologies, ensuring vendor independence, long-term solution sustainability, and alignment with public & private sector best practices.
- **Forward-Thinking Expertise:** Leverage 20+ years of experience to proactively address emerging threats and technologies, staying ahead of evolving cloud mandates.
- **Efficiency Experts:** We identify inefficiencies and design secure, self-service, and automated solutions to streamline operations
- **Trusted Security Partner:** Holds industry-leading certifications (Certified Kubernetes Admin, GCP Certified Cloud Engineer, AWS Solution Architect Associate) and maintains DoD Secret Clearance.

Past Performance

- Amdocs
- T-Mobile
- Delta Air Lines
- Cisco Webex
- US Air Force | Kessel Run
- UKG

Certifications
